

# Formby 2008 Pox Outbreak

There is a squirrel pox outbreak **now** in Formby. The virus is carried and transmitted by grey squirrels and **deadly** to any reds that come into contact with it.

We need your help to reduce the spread of the disease.

What you can do:

- Ring **0151 920 3769** if you see a sick or dead red squirrel.
- Or report it to the National Trust Kiosk at Victoria Road.
- Do not handle sick animals.
- Help us to control greys by reporting any that you see locally.
- Clean or remove bird tables or squirrel feeders, to reduce infection.

**Squirrel Pox**
